

OUR PACKAGED SYSTEMS ARE PEERLESS

Peerless Pump offers engineered pump solutions through Peerless Engineered Systems (PES). We design and build these custom packaged systems to meet unique, complex pumping challenges for operations around the world. Each system comprises a pump, driver, piping and valves — all pre-constructed on a skid. We take full ownership and complete unit responsibility, leveraging our years of experience to ensure superior solutions for your application.

APPLICATIONS

Water Utility

For municipal water supply, water treatment, flood control, and more. The systems can be installed during any phase of construction, or split to fit through existing doorways. System enclosures are IBC compliant with ventilation or climate control. Buildings around the systems can be manufactured in nearly any style and color.

Industrial & Power Generation

For power generating plants, manufacturing facilities and other heavy industrial end users. PES has worked with large engineering firms to build systems for many new facilities across the United States and has expertise in evaluating specifications and providing valuable input in to system design.

Oil and Gas

For LNG terminals, drilling platforms, production platforms, FPSO and FSO or onshore storage and distribution terminals. PES has built systems in coastal regions throughout the world, using super duplex stainless steel and nickel aluminum bronze pump materials for aggressive marine applications.

THE VALUE OF WORKING WITH US

EXCEPTIONAL DESIGN

Our engineering and project management teams ensure that every system meets your specifications and standards for compliance and quality. Our experience is unparalleled in the industry.

EASY PURCHASING

You receive detailed, comprehensive pricing upfront and one simple PO. Save up to 28% by choosing a packaged system over a component system because there are no hidden manpower costs, overruns or unforeseen operational problems.

QUALITY CONSTRUCTION

Every system is built in our ISO 9001 certified manufacturing facility and quality inspected with all components in place.

QUICK INSTALLATION

Your fully functioning system arrives on time and ready for quick installation, with interconnected wiring and as few as three connections. Preconstruction and our on-site testing and commissioning services keep costs low.

COMPREHENSIVE SERVICE

Single-source responsibility means you have one point of contact for all service and warranty inquiries.

SPECIFICATIONS

Capacities	Vertical turbine models Up to 150,000 gpm (34,068 m ³ /hr)
	Horizontal split case models Up to 10,000 gpm (2,271 m ³ /hr)
	End suction models Up to 900 gpm (204 m ³ /hr)
Heads	Up to 2,300 feet (701 meters)
Horsepower	Up to 5,000 hp (3,730 kW)
Temperature	Up to 450°F (232°C)
Drives	Motors, engines, steam turbines, combinations
Materials	Cast iron, bronze fitted as standard. Other materials available.
Compliance	UL Listing For Packaged Systems, Components Listed for NSF-61, Panels UL508 Listed (where applicable).

Let us build your packaged pump system so you can focus on the rest of your project. Call **800.879.0182** or visit **peerlesspump.com** to get started.
